

Sad to say, but the super-low municipal interest rates that had bottomed out the last 2 years are now history. Wall Street analysts see more hikes coming. Can your agency afford higher prices for the same equipment in 2022? Are you ready?

Interest Rates Are Going Up (a lot!)

It's "the perfect storm."

And most governments can't financially "out-manuever" long-term financial trends like sky-high interest rates and exploding inflation.

WALL STREET JOURNAL

"The Fed Maps Out 2022 Rate Increases"
"Fed's (Most Recent) Rate Increase Is Biggest In 30 Years"
"Fed...Signals SIX RATE INCREASES likely in 2022" (6!)
"Inflation Hits 40-year high - Reaching 8.6%"
"Surging Interest Rates Ripple Through Economy"
"Interest Rate Rise Stings..."

Whammy! Every government acquisition's "all-in" cost will be significantly higher in the next 12 months. Your agency will be spending more for everything and getting less as INTEREST RATES ROCKET UP from historically low rates just 12 months ago.

Double Whammy! Inflation (nearly flat for years) is driving up vehicle & equipment costs. INFLATION IS HIGHER THAN IT'S BEEN IN 40 YEARS. There are no indications that this is just "temporary."

Lock in today's rates, or lose them!

Invest in saving money. Waiting will cost more! Prices are up on everything in just a matter of months. BUT, you can at least lock in current equipment prices and lock in our still lower government interest rates and lower payments for years. Get a fast, free **one-page lease-to-own quote** for government fleet vehicles, law enforcement, fire, school, IT, construction, public works, energy upgrades, IT hardware, and software. See the payments and interest rates on whatever you're going to need. *What's the downside?*
